

Welcome to OpenUp!

We are very happy to help you with the onboarding process. You have just downloaded the welcome package. This is a brief overview of the content and where to use it for.

1. **OpenUp onboarding presentation**

This presentation gives a quick overview of what you can expect from OpenUp and what services we offer. This will also help you with creating a communication plan for the launch of OpenUp. Lastly you will find an example of the report that you will receive every month on the use of OpenUp in your organization.

2. **OpenUp one pager**

You can use this one pager to inform everyone in your organization about OpenUp and how to use it. Send it around, share it in your teamchat or intranet or print it and hang it next to the coffee machine!

3. **OpenUp - our 5 promises**

This are our 5 promises to you as a partner of OpenUp. So you know what to expect from us and to help you answer questions from within your organization.

4. **OpenUp launch text templates**

These templates will help you introduce OpenUp in and outside of your organization. You will find long and short templates for email and chat tools, addressed to either managers or employees. Next to this there are some LinkedIn templates as inspiration for you to use.

5. **Scheduler demo**

But how do I book a session? This is a question you will get for sure and that is why we made this video.

We hope this all will help you with the launch and use of OpenUp. For feedback and questions please reach out to your Customer Success Manager!
